

# THE FUTURE OF COLOUR TECHNOLOGY IS HERE

The ergonomically advanced Acquire™ Quantum EFX Spectrophotometer, packs innovative technology into a smaller, lighter and highly intuitive colour measuring tool with Wi-Fi capabilities. Its proven 3-angled measurement technique and smaller aperture, allows for faster more accurate readings of metallic, sparkle, pearl and effect colours, even on curved and hard-to-reach places!

The Acquire™ Quantum EFX top-mounted full colour touch screen has 180° rotation capabilities, suitable for left and right hand users. The screen is calibrated for high visibility even in bright outdoor light and can be used while wearing gloves. It comes with a "smart cradle" for charging and direct connection to a PC. And, works seamlessly with Axalta's colour retrieval software, to give precise matches for improved bodyshop productivity and efficiency. A taste of the future today!

## Features

- Easy to use
- Wi-Fi enabled
- Hi-res colour touch screen
- Built-in rechargeable battery
- Reads complex colour and effect formulas
- Suitable for both left and right handed users
- Robust case with charging station, cable, lens cap, stylus and calibration tiles
