

The Xtreme System: The new VOC-Xtreme Wet-on-Wet Filler U7650.

The Art of Refinishing.

An Axalta Coating Systems Brand

Xtreme quick turnaround for new parts.

The new VOC-Xtreme Wet-on-Wet Filler U7650 significantly reduces throughput times for new parts. Thanks to patented Axalta technology, flash-off times have been reduced to a minimum compared to conventional wet-on-wet fillers.

1. Xtreme easy to use.

Simply mix VOC-Xtreme Wet-on-Wet Filler U7650 1:1 with Xtreme Wet-on-Wet Filler Hardener 4650 and 10% Xtreme Filler Accelerator U7610 and you're ready to go.

2. Xtreme quick flash-off times.

After just 5 minutes flash-off time, you can apply Standoblue or Standohyd Plus Basecoat to the surface or, if needed, make slight repairs (e.g. remove dust particles).

3. Xtreme great hold.

The special chemical composition of VOC-Xtreme Wet-on-Wet Filler U7650 provides for outstanding hold on vertical surfaces – which means greater reliability when applying a finish.

4. Xtreme brilliant topcoat appearance.

The innovative technology lets you achieve a very smooth, uniform surface. It also offers outstanding topcoat hold.

5. Xtreme optimum colour selection.

VOC-Xtreme Wet-on-Wet Filler U7650 is available in 3 colours: white FC1, grey FC2 and black FC3. This gives you greater coverage even in lighter shades while also reducing your consumption.
