

**The Xtreme System:  
Brilliant finish.**

An Axalta Coating Systems Brand

**The Art of Refinishing.**

## Xtreme performance.

The Standox Xtreme System is not only setting a new standard in terms of speed and energy efficiency; thanks to innovative Axalta technology it also ranks first in terms of the intensity of its clearcoat gloss. This kind of quality can stand up to even the most intense scrutiny.

### 1. Xtreme outstanding properties.

The Xtreme System features top-quality properties, like easy and reliable application, uniform flow, an exceptionally smooth surface and an impressive finish.

### 2. Xtreme filler qualities.

The special chemical composition used in VOC-Xtreme Wet-on-Wet Filler U7650 and VOC-Xtreme Filler U7600 offers great hold on vertical surfaces. This makes the application process easy and reliable. The new technology provides the basis for an exceptionally uniform, smooth surface and is what accounts for the outstanding topcoat.

### 3. Xtreme clearcoat hardening.

Standocryl VOC-Xtreme Clear K9580 dries extremely fast and provides impressive through-curing. Another advantage is its great flow and striking gloss.

### 4. Xtreme colour accuracy.

Standoble Basecoat scores additional points through its "One Visit Application" process, as well as its excellent coverage and colour accuracy.
