

# Standocryl VOC-Xtreme Clear K9580 – Why compromise?

An Axalta Coating Systems Brand

**The Art of Refinishing.**

## **Standocryl VOC-Xtreme Clear K9580 – the clearcoat revolution.**

The start of a new era.

For further information, visit [standox.com/xtreme](https://standox.com/xtreme)

## **Xtreme gloss.**

Why settle for “high” gloss when you can have “xtreme” gloss in a spectacular topcoat applied in a single pass? That’s not just a pledge, but reality thanks to a new, patented binder technology. Meet Standocryl VOC-Xtreme Clear K9580.

- Sensational gloss in a single pass
- Extreme hardness
- Smooth, mirror-like surface
- Innovative paint technology

## Xtreme speed.

A revolution. This innovative paint system not only uses heat but also relative humidity to dry. This makes it possible to cut drying times significantly using a choice of two hardeners:

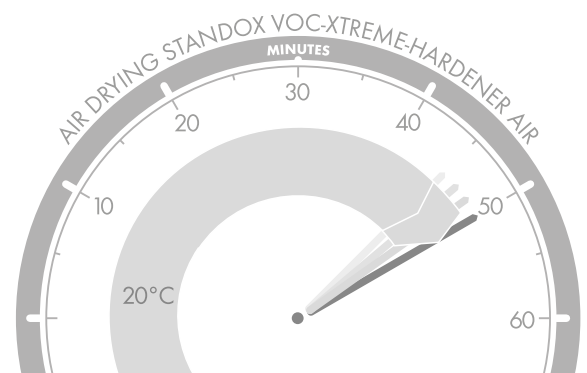

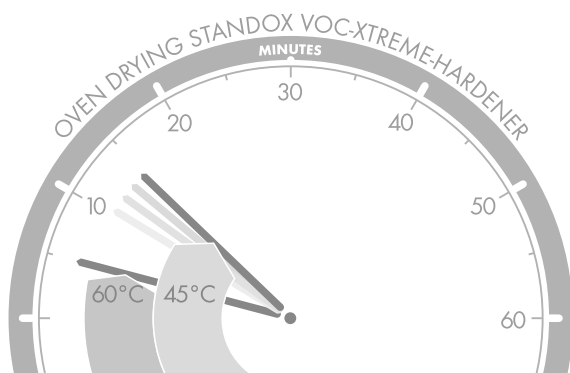

### **Standox VOC -Xtreme Hardener**

- Dries in 5 minutes at 60°C object temperature
- Dries in 15 - 20 minutes at 40°C-45°C object temperature
- Suitable for low humidity air drying

### **Standox VOC -Xtreme Hardener Air**

- Dries in 45 - 50 minutes at 20°C ambient temperature

For detailed information refer to the technical data sheet.

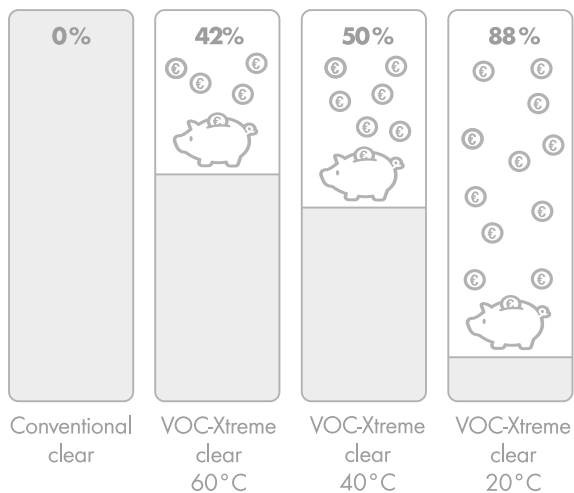

## Xtreme energy efficiency.

Standocryl VOC-Xtreme Clear K9580 allows you to make significant energy savings, when oven drying at 60°C or lower object temperatures, and when air drying at ambient temperatures. This can translate into real cash savings.
