An Axalta Coating Systems Brand

Standofleet – always ready at hand, for all applications.

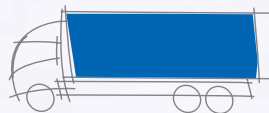

Standofleet stands for quality, versatility and perfection in professional commercial vehicle refinishing.

The Standofleet system is based on an innovative pigment/binder technology which enables you to meet the specific needs of your customers. The highly versatile Standofleet range allows you to put together the perfect combination of high-quality paint layers for each job.

After all, each paint job is unique – when you refinish a coach, you have to take different factors into account than in coating construction equipment or trucks. One important issue is the substrate to be coated or refinished (e.g. steel, aluminium, plastic) and the specific area of the vehicle.

Standofleet provides you with the perfect solution for any paint job.
