

A high speed clearcoat with a stellar finish.
The versatile Standocryl 2K Classic Pro Clear K9070.

An Axalta Coating Systems Brand

The Art of Refinishing.

A world of new possibilities.

Discover the versatile new clearcoat that delivers quality and performance.

Thanks to advanced Axalta technology, Standox Standocryl 2K Classic Pro Clear K9070 gives you both high productivity and an excellent finish. It also saves energy by giving you different drying options which help you save energy either with a shorter drying time or longer drying at lower temperatures.

High performance – in speed and energy savings.

Whether you dry in just 15 minutes at 60°C, 30 minutes at 40°C or air dry in 2-3 hours, you'll minimize energy usage. Use it for all types of repairs – from spot and panel repairs to full car sprays.

A quality appearance – every time.

Whichever drying option you choose, count on an excellent finish with zero compromise – even in high temperature or humidity conditions.

Change the game – without changing how you work.

For maximum flexibility, it is simple to apply on both solvent-borne and waterborne basecoats. Best of all, you can continue using the same hardeners and thinners you're used to using.

@60°C: 15'

@40°C: 30'

Air drying: 2-3 hours
