

Standofleet.
Quality and efficiency in commercial vehicle refinishing.

The Art of Refinishing.

The benchmark in commercial vehicle refinishing.

If productivity is your main concern, Standofleet is the way forward. Designed and formulated for superior quality, versatility and ease of use, this innovative commercial vehicle refinishing system from Standox delivers genuine benefits for your business.

Standofleet uses an innovative pigment/binder technology. No matter what the priorities of you or your customers – resistance, high quality, easy application, environmental compatibility or efficiency – Standofleet has exactly the right solution for all requirements. Meeting the needs of the market has never been easier.

Based on an innovative modular system, Standofleet allows for the combination of various concentrated tinters and binders to obtain a range of topcoats.

This single system is all you need to coat the chassis of a grab-truck just as easily as the bodywork of a coach. The strength, resistance and gloss of the paint are determined by your choice of components.

Even though Standofleet offers maximum flexibility, the number of components is small. Just 26 concentrates tinters covers the entire range of solid colors used in today's commercial vehicle refinishing.

Greater efficiency for increased competitiveness.

Imagine a single mixing system to cover all your topcoat needs.

Efficiency and profitability are key in commercial vehicle refinishing. This is why the Standofleet paint system is designed to adapt to all your requirements.

The Standofleet mixing system offers a comprehensive range of colors from just a few individual components. So you have all colors at hand in a system that is high in productivity but low in stocking costs.

The high solid content of the HS paints provides for a high yield and excellent covering power. Meeting the strict requirements of the European VOC

legislation is no problem at all. In addition, proven MS products are available for regions that are not subject to the VOC legislation.

High productivity and efficiency can only be reached when every element of your business is working in harmony. Your technical advisor from Standox will analyse your special requirements at your premises so you can benefit from a paint system that is perfectly tailored to your needs.

A clean solution for all requirements.

ProFuture

Look out for the **ProFuture** label which identifies all VOC-compatible products from Standox.

Standox is the first manufacturer to offer a complete system for commercial vehicle refinishing that meets the strict VOC limits of the European Union.

What's more, Standofleet is suitable for all paint jobs, so that no additional system is required to achieve VOC compatibility.

The Standofleet range of VOC-compatible products. Quality to meet today's needs.

STANDOFLEET 2K VOC Clear

Max. permissible VOC value 420 g/l
Two-pack clearcoat for an optimum surface finish

- Simple and reliable application even on vertical surfaces
- Excellent gloss and flow
- Excellent hold-out
- Reliable and quick drying

STANDOFLEET 2K HS Topcoat

Max. permissible VOC value 420 g/l
Two-pack polyurethane topcoat for perfect vehicle refinishing

- Excellent weather resistance
- Superior mechanical resistance
- Excellent chemical resistance
- Optimum opacity
- High efficiency

STANDOFLEET 2K HS High Build Topcoat

Max. permissible VOC value 420 g/l
Two-pack polyurethane topcoat for tough conditions

- Maximum mechanical and chemical resistance
- Good filling power and high film build
- Application in one spray pass
- High efficiency

STANDOFLEET Washprimer 1:1 transparent

Max. permissible VOC value 780 g/l
Passivating acid primer for three-coat build-ups

- Excellent corrosion protection
- For problematic substrates
- Optimum adhesion

STANDOFLEET 1K Primer

Max. permissible VOC value 780 g/l
One-pack primer for efficient refinishing

- Quick drying
- Excellent adhesion

STANDOFLEET Reaction Primer

Max. permissible VOC value 780 g/l
Two-pack primer for problematic substrates such as aluminium and galvanised surfaces

- Excellent corrosion protection
- Can be used for two-coat and three-coat build-ups

STANDOFLEET 1K Welding Primer

Max. permissible VOC value 780 g/l
One-pack acid primer

- Good corrosion protection
- No welding test required
- Quick drying

STANDOFLEET 2K VOC Sanding Filler

Max. permissible VOC value 540 g/l
Two-pack filler for optimum topcoat gloss and flow

- Excellent filling power
- Good hold-out
- Easy application and reliable drying
- Easy to sand

STANDOFLEET 2K VOC Non Sanding Filler

Max. permissible VOC value 540 g/l
High-quality 2K primer filler available in two colors, easily mixed to produce many shades of grey

- Excellent yield
- Easy to mix for optimum opacity
- Application in one spray pass
- Excellent topcoat hold-out

STANDOFLEET

Epoxy Surfacer 5:1

Max. permissible VOC value 540 g/l

Special thixotropic filler on epoxy basis

- Very good corrosion protection
- Excellent hold-out on vertical surfaces
- Can be used in two-coat and three-coat build-ups

STANDOFLEET

2K Primer Surfacer

Max. permissible VOC value 540 g/l

Two-pack polyurethane filler for refinishing

- Excellent sanding properties
- Adhesion promoter for chassis coatings
- Can also be applied wet on wet

STANDOFLEET

2K Non Sanding Filler

Max. permissible VOC value 540 g/l

Special wet-on-wet filler for efficient refinishing

- Excellent spray pass absorption
- Excellent topcoat hold-out

STANDOFLEET

2K VOC Universal Primer Filler

Max. permissible VOC value 540 g/l

Two-pack polyurethane thixotropic filler for two-coat build-ups on all metallic substrates

- Excellent filling power
- Quick drying
- Good corrosion protection

STANDOFLEET

2K VOC High Build Primer

Max. permissible VOC value 540 g/l

Two-pack primer for high demands

- Excellent filling power
- Storage up to six months
- For two-coat build-up
- No welding test required

STANDOFLEET

2K Sealer

Max. permissible VOC value 540 g/l

Glazing two-pack polyurethane sealer

- Transparent adhesion promoter
- Ideal for efficient refinishing
- Good adhesion to unsanded surfaces

The Standofleet range of MS products. Proven quality from Standox.

STANDOFLEET

2K MS Clear

Two-pack MS clear for commercial vehicles

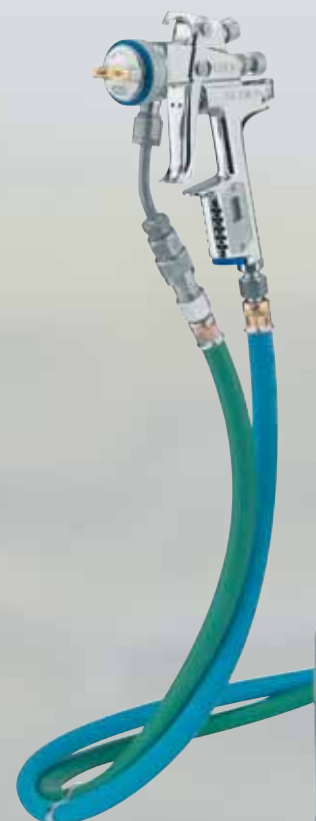

- High mechanical and chemical resistance
- Durable high gloss for two-coat and multi-colored (re)finishes

STANDOFLEET

2K MS Topcoat

Two-pack polyurethane topcoat for vehicle refinishing

- Good gloss and color retention
- High mechanical and chemical resistance
- Quick drying
- Good chemical resistance
- Good opacity

One refinishing system for all applications.

Standofleet is the right choice for a wide variety of substrates from trucks and buses to special-purpose vehicles.

The system comprises special components for all kinds of problems and applications, so no matter whether you use Standofleet on steel, aluminium or plastic, you always achieve a perfect result.

Hardeners, binders and thinners developed for particular needs provide for optimum refinishing results independently of your technical resources and climatic conditions.

Your Technical Advisor from Standox will provide you with a printed overview of refinishing recommendations tailored to your bodyshop's unique needs. This way your employees have access to meaningful information at all times.

In a nutshell: Standofleet is the universal solution for your commercial vehicle refinishing business.

Chassis

- Uncoated/galvanised steel
- Old paintwork
- Aluminium

Superstructures/articulated trailers

- Uncoated/galvanised steel
- Old paintwork
- Aluminium
- Plastic

Cabin

- Steel
- Aluminium
- Plastic

Perfect tools for perfect quality.

Whatever the color, Standofleet puts you in control.

The materials for chassis and super-structures change all the time. Today, they are made from steel, aluminium or plastic and new trends continue to emerge.

This is why Standox offers comprehensive support in addition to a special Standofleet product training so that you will benefit from Standofleet right from the first day you use it.

Perfect tinting is a decisive factor in the refinishing business. Standofleet offers you proven tools to achieve this.

The Standofleet Colorposter shows all color shades and the major tints at one glance. In the Standofleet Color Box you find more than 3,000 colors – in chronological order – on large painted fans. And then there is Genius+, an advanced color measuring system.

Of course you can always call the Standox Coloristics Hotline where our experts will help you in next to no time.

Success through professional training.

A good product needs to be applied professionally. Standofleet training is your key to success.

Practical training sessions in large spray booths suitable for large vehicles help to get you and your employees off to a flying start. The professional Standofleet training programme is your ticket to achieving superior refinishing results. Ask your Standox Technical Advisor for training offered in your region.
