

Saved Orders

In case there are certain product combinations which you will order repeatedly, consider to store them as **“Saved Orders”**.

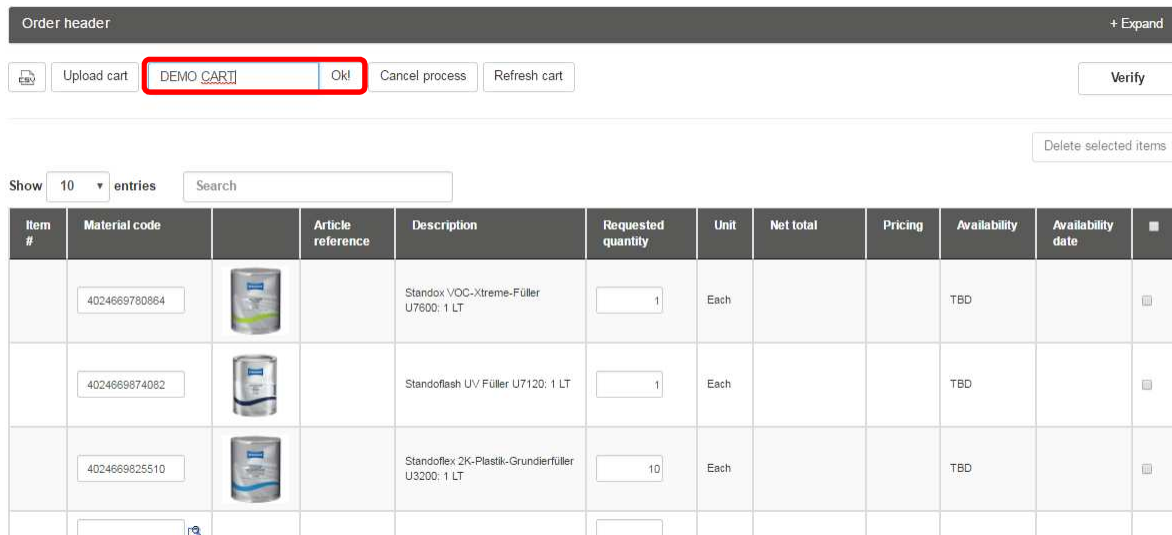

For this, simply click the **„Save cart“** button, once your shopping list is complete.

The screenshot shows the 'Order header' section of a shopping cart interface. At the top, there is a dark grey bar with 'Order header' on the left and '+ Expand' on the right. Below this bar, there are several buttons: 'Upload cart', 'Save cart' (highlighted with a red border), 'Cancel process', and 'Refresh cart'. To the right of these buttons is a 'Verify' button. Below the buttons, there is a search bar and a 'Delete selected items' button. The main part of the screenshot is a table with the following columns: 'Item #', 'Material code', 'Article reference', 'Description', 'Requested quantity', 'Unit', 'Net total', 'Pricing', 'Availability', 'Availability date', and a small square icon. The table contains three rows of product data:

Item #	Material code	Article reference	Description	Requested quantity	Unit	Net total	Pricing	Availability	Availability date	
	4024669780864		Stadox VOC-Xtreme-Füller U7600: 1 LT	1	Each			TBD		
	4024669874082		Standoflash UV Füller U7120: 1 LT	1	Each			TBD		
	4024669825510		Standoflex 2K-Plastik-Grundierfüller U3200: 1 LT	10	Each			TBD		

A text field pops up where you enter the name of this particular cart. Confirm with **“OK”**.

The screenshot shows the 'Order header' section of a shopping cart interface, similar to the previous one. The 'Save cart' button is highlighted with a red border, and a text field next to it contains the text 'DEMO CART'. To the right of the text field is an 'OK!' button, also highlighted with a red border. The rest of the interface, including the 'Verify' button, search bar, and product table, is identical to the previous screenshot.

The cart is saved now. You can keep up to 10 different saved orders at the same time.

You can retrieve your saved carts under „**Ordering**“, Submenu „**Saved Orders**“.

There are two ways to recover “**Saved Orders**” for your next purchase:

“**Activate**” and “**Append All**”.

- With the button “**Activate**” you can use the content of the respective cart for your next order. However, this will overwrite any other previous items in your cart!
- If you click on “**Append all**”, the content of that saved cart will be added to the current cart. After that, you can still manually add or delete items, or upload a file with additional items to make your order complete.
