# Join the digital colour matching revolution.

The extra small **Genius XS** spectrophotometer puts the latest technology and digital colour matching precision in your hands.

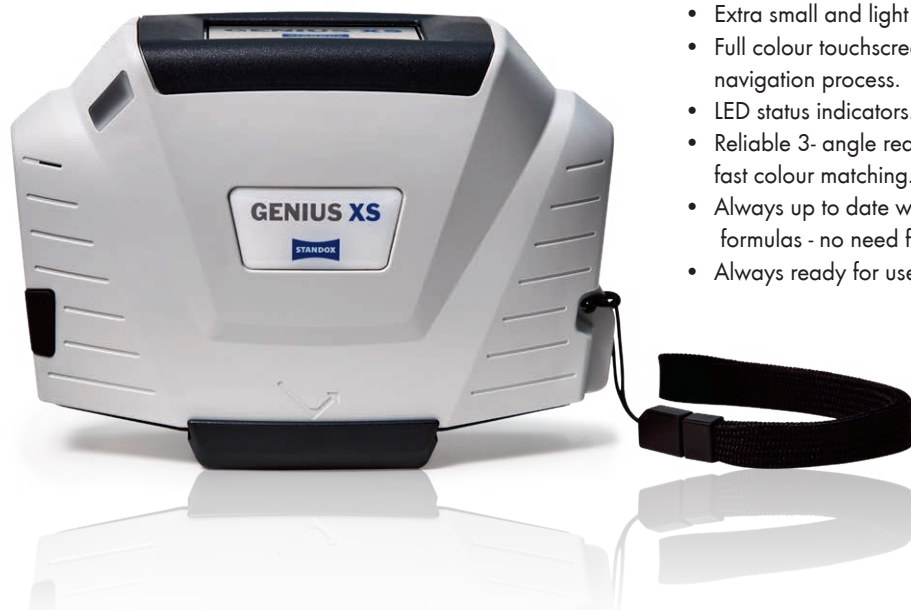

Featuring the latest LED technology and 3-angle measurement the **Genius XS** measures solid as well as effect colours allowing fast formula matching. And as measurements are done straight from the cleaned car body around the damaged area, it is ideal for single day repairs and demanding colour matches such as variant colour shades not available in conventional colour documentation.

The **Genius XS** is easy to use with single-click measurement button, high-resolution touch screen operation and clear operator feedback via LED indicators and acoustic signals.

Connect **Genius XS** with a direct micro USB to the online **Standwin iQ** software and you quickly get a complete formula match. With over 200,000 constantly maintained formulas always available there is no need for you to update your colour documentation.

No more time-consuming fan deck searches. The **Genius XS** from Standox will revolutionise your colour matching process.

## Genius XS

- Extra small and light weight. Easy to handle.
- Full colour touchscreen display. Simple on-screen navigation process.
- LED status indicators. Direct status feedback.
- Reliable 3- angle reading technology. With Standwin iQ fast colour matching.
- Always up to date with over 200,000 constantly updated formulas - no need for Color Box updates.
