

## Genius XS Spectrophotometer

Join the digital colour matching revolution.

**The extra small Genius XS spectrophotometer puts the latest technology and digital colour matching precision in your hands.**

The Genius XS features the latest LED technology and 3-angle measurement and measures solid as well as effect colours allowing fast formula matching. Measurements are done straight from the cleaned car body around the damaged paint area, so it is ideal for single-day car repairs and demanding colour matches such as variant colour shades not available in conventional colour documentation.

The Genius XS is easy to use with a single-click measurement button, high-resolution touch screen operation and clear operator feedback via LED indicators and acoustic signals.

The Genius XS connects with a direct micro USB to the online [Standwin iQ software](#) to quickly give you a complete formula match. With over 200,000 constantly maintained formulas always available there is no need for you to update your colour documentation.

No need for time-consuming fan deck searches. The Genius XS from Standox will revolutionise your colour matching process.

### Features

- Extra small and light weight. Easy to handle.
- Full colour touchscreen display. Simple on-screen navigation process.
- LED status indicators. Direct status feedback.
- Reliable 3- angle reading technology. With Standwin iQ fast colour matching.
- Always up to date with over 200,000 constantly updated formulas - no need for Color Box updates.
- Always ready for use with rechargeable batteries.
