## Data Sheets

### Technical & Safety Data Sheets for Passenger Cars and Commercial Vehicle Paint Systems.

Designed for the professional refinisher, the technical data sheets provide comprehensive mixing instructions, application guidelines and safety data to assist in maximising product and system benefits.

---

### Technical & Safety Data Sheets for Standofleet Industry.

We are changing the labelling of our products from the end of 2013. The change is required by all EU Member States to meet the **European regulation on classification, labelling and packaging (CLP)** of substances and mixtures. The CLP Regulation ensures that the hazards posed by certain chemicals are clearly explained to workers and consumers in the EU. Labels (and safety data sheets) will look different in future but this does not necessarily reflect a change in the composition or performance of – your tried and tested Standox products.

**Flame**  
Flammables  
Pyrophorics  
Self-Heating  
Emits Flammable Gas
