

## Intelligent clearcoat for more efficient processing

### Fast, easy-to-use and shiny results: The new Standocryl VOC Performance Pro Clear K9590 can be flexibly adapted to any operating procedures.

The Standocryl VOC Performance Pro Clear K9590 is ideal for particularly efficient work. Harald Klöckner, Standox Head of Training and Technical Service EMEA, explains why: "The clearcoat is not just easy and quick to use. Workshops can also flexibly adapt the drying time to the respective operating processes." If you want to save on energy costs, the clearcoat can be dried within 30 minutes at an object temperature of 40 degrees Celsius. If fast processes are more important, 60 degrees of object temperature will accelerate drying to just 15 minutes. This is made possible by a new binder technology developed for extremely fast drying times with excellent application properties.

Then you can proceed directly to polishing and assembly of the vehicle parts. "This means that the workshop benefits in every situation," says Klöckner, "and can complete a full repair in one day."

Harald Klöckner, Standox Head of Training and Technical Service EMEA: "Standocryl VOC Performance Pro Clear K9590 from Standox gives great results."

### Excellent results

The Standocryl VOC Performance Pro Clear also impresses with its excellent holdout. Harald Klöckner: "The pioneering technology allows for excellent clearcoat results – it has very good flow properties and a high degree of gloss." Thanks to the low spray viscosity, the clearcoat can also be easily applied in two passes with a short flash-off time.

**Quote: "Bodyshops and dealerships can flexibly adapt the drying time to the respective operating processes. This means that every workshop benefits."**

### For professional performance

The full Performance Pro product range consists of the clearcoat, the associated VOC Performance Hardener 15-30 and the VOC 2K Performance Additive 5870. In addition, the Performance Blend 5730 lets you achieve soft blending areas. Klöckner: "A range that enables every bodyshop to work efficiently with the familiar Standox high quality."

Fast, easy-to-use and shiny results: With Standocryl VOC Performance Pro Clear K9590, Standox offers an intelligent clearcoat.

With Performance Pro, companies can offer their customers paint repairs within one day - a service for which Standox has developed the "1DayRepair" marketing concept. This enables repair shops to specifically serve both private customers and fleet and leasing companies. Besides saving time on repairs, the cost of replacement vehicles can also be reduced. Further information about 1DayRepair can be found at [www.standox.co.uk/1dayrepair](http://www.standox.co.uk/1dayrepair).
